Art Unit: 1762

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to a product.

Group II, claim(s) 18-20, drawn to a method.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of the group I invention is a device for reflecting electromagnetic waves comprising 2 plates connected to each other so as to enclose an airtight space with a reflecting element between the two plates, this device and the special technical features of this device are not present in Group II. The special technical feature of Group II is a method for the metallization of a film characterized in that the method comprises moving a covering plate between the metal vapor source and the roller according to a time function corresponding to the velocity of the film this is not present in Group I.

A telephone call was made to Robert Kinberg on 10/20/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Howard E. Abramowitz whose telephone number is 571-272-8557. The examiner can normally be reached on monday-friday 9:00-5:00.
